PEPA

White Paper 2024

1.Introduction

PEPA is a new form of cryptocurrency project that brings unique and playful characters into the world of digital currency and blockchain technology.
The project brings innovation to traditional financial technology and builds a virtual economy populated by unique characters.
The project is based on proprietary blockchain technology, where each character has a unique impact on the block generation process.
In order for PEPA Coin to become the main chain in the future, we will first raise awareness of the polygon chain and then work on developing our own chain.

2.Mission

1. promote fun learning and engagement
Cryptocurrency and blockchain technology can be esoteric and complex for many people, and PEPA provides an environment where users can learn about cryptocurrency and its technical underpinnings while having fun. Our mission is to lower the barriers to learning technology and create opportunities for many people to become familiar with virtual currency in a natural way.

2. enhancing decentralized community and collaboration
PEPA aims to create a decentralized, community-driven ecosystem. We value providing a platform where users can directly influence how their coins are used and how their characters evolve, working together to grow the project. Our goal is to create an economic model for the future that is built not by centralized power, but by the entire community sharing their opinions and working together.

2.Features

Conventional meme tokens are characterized by high volatility and have a high-risk, high-return image, but as for PEPA, we will announce at Talkn Economics that we will limit the supply to prevent as much volatility as possible and inflation per token. We are thinking in the direction of preventing inflation per token by limiting the supply. Our management policy is to bring the value of the tokens to a peak at the next half-life, not just at this half-life, but only at the next half-life.

$PEPA

Token Name	:	PEPA
Token Symbol	:	PEPA
Network	:	Polygon
Total Supply	:	1,000,000,000

Token Distribution

- Reserve (for Future: 10.0%
- Staking & Rewards: 10.0%
- Marketing & Promotion: 10.0%
- Liquidity Pool: 25.0%
- Airdrop to Community: 30.0%
- Team and Developers: 15.0%

3.Tokenomics

- Inflation and Deflation Mechanisms
Burning Mechanism: Introduce a system where a portion of tokens is burned (destroyed) with each transaction, reducing the circulating supply and increasing scarcity.
Partial Burn of Fees: Implement transaction fees, a portion of which will be burned, helping to decrease the overall supply and support the value of the token.

- Sustainable Growth Strategy
Ecosystem Expansion: Aim for sustainable growth by expanding beyond a simple meme coin, incorporating new projects and use cases such as games, DeFi, and NFTs.
Community Building: Regularly host events and social media campaigns to engage users, promote interaction among holders, and encourage deeper involvement in the project.

By building this kind of tokenomics structure, you can enhance the sustainability of meme coins like PEPA, expand the community, and increase the token's value over time.

4.Roadmap

1. Project Launch: Release PEPA and develop the blockchain technology and game ecosystem, introducing the project's core functions.
2. Small Listings: List PEPA tokens on small DEX and CEX for early trading by investors and users.
3. Social Media Expansion: Increase project visibility through platforms like Twitter and Telegram, with a focus on growing Twitter activity.
4. Twitter Trending: Aim to make PEPA trend on Twitter through promotional campaigns.
5. Achieve 1000+ Holders: Target acquiring over 1000 token holders to build community trust and boost ecosystem participation.

4.Team & Socials

Team

PEPA is developed by a diverse team with expertise in technology, design, entertainment, and community. Each member of the team brings a unique perspective and skill set to the PEPA universe.
